

Individual Tests

Coliform and E-coli Bacteria

¹ Enzymatic Substrate	Standard bacteria detection test (results reported as safe or unsafe)	\$28.00
¹ Quanti Tray	Bacteria test (results reported as number present [count] ²)	\$36.00

Other Bacteria

³ Iron Bacteria	Non-harmful bacteria (causes slime and odor)	\$36.00
³ Sulfur Bacteria	Non-harmful bacteria (causes odor)	\$36.00

1. Bacteria samples must be received by the lab within 30 hours of the time the sample is taken.
2. Counts provide the number of bacteria colonies present in the water.
3. Test may require up to two weeks.

Inorganics (in alphabetical order)

Alkalinity	\$18.00	Mercury	\$36.00
Aluminum	\$18.00	Molybdenum	\$18.00
Antimony	\$36.00	Nickel	\$18.00
Arsenic	\$36.00	Nitrate	\$28.00
Barium	\$22.00	Nitrite	\$36.00
Beryllium	\$18.00	pH	\$18.00
Boron	\$18.00	Phosphate	\$24.00
Bromide	\$18.00	Phosphorus (Total)	\$18.00
Cadmium	\$18.00	Potassium	\$18.00
Calcium	\$18.00	Selenium	\$36.00
Chloride	\$24.00	Silicon	\$18.00
Chlorine	\$18.00	Silver	\$18.00
Chromium	\$18.00	Sodium	\$18.00
Cobalt	\$18.00	Strontium	\$18.00
Conductivity	\$18.00	Sulfate	\$24.00
Copper	\$36.00	Tannin	\$25.00
Fluoride	\$18.00	Thallium	\$36.00
Hardness	\$18.00	Total Dissolved Solids	\$18.00
Iron	\$18.00	Total Suspended Solids	\$24.00
Lead	\$36.00	Turbidity	\$18.00
Magnesium	\$18.00	Vanadium	\$18.00
Manganese	\$18.00	Zinc	\$18.00

Other inorganics available upon request.

Radiochemistry*

Gross Alpha/Beta	Screening for presence of radioactivity in water	\$89.00
Radium 226	Recommended if gross alpha/beta is high	\$139.00
Radium 228	Recommended if gross alpha is very high	\$139.00
Total Uranium	Recommended if gross alpha is very high	\$30.00
Radon 3-7 Day (Air)	Test for radioactive gas in the air	\$30.00
Radon (In Water)	Test for radon in water	\$40.00

*Special containers needed for all radiochemistry tests. Please call to obtain sample container. Allow 3-4 weeks for testing.

This CWT price sheet is to be used as a guide for tests and services provided. Some tests which are performed for informational purposes are only tested to standard methods, but may not be certified by the State of Wisconsin.

Prices: All prices are subject to change without notice.

Confidentiality: All work performed at CWT is done under strict confidence. Results are released to the client and will not be released to a third party without consent of said client.

Rush Services: Additional charges may be incurred for expediting services. Please call us before sending rush samples to ensure the expected turnaround time.

Sample Containers: Most samples require a special sterile container with or without preservatives. CWT can provide these containers upon request. If unsure of the sample's requirements, please call us.

Clean Water Testing (CWT) is a Limited Liability Corporation owned by Water-Right, Incorporated of Appleton, Wisconsin.

Water Testing Packages*

	Price
Basic Annual Testing Package	\$74.00
Description: Includes tests that are recommended on an <u>annual</u> basis. Note: If nitrate is elevated, the pesticide/herbicide screen is recommended.	
<i>Test Parameters:</i> Coliform Bacteria, E-coli, Nitrate, and Arsenic.	
Home Safety Package	\$125.00
Description: This package is designed to inform you of the general health and safety of your water. This package does not include <u>all</u> of the health and safety parameters (i.e. VOC's, pesticides, herbicides, etc.).	
<i>Test Parameters:</i> Basic Annual Package PLUS Lead, Fluoride, Chlorides, Phosphates, and Sulfates.	
Well Water Quality Package	\$199.00
Description: This package will detail what is present in your water and whether it is "safe" to drink.	
<i>Test Parameters:</i> Home Safety Package PLUS the Mineral Scan (listed below).	
Comprehensive Water Package	\$299.00
Description: Well Water Quality Package plus Volatile Organics (gasoline, diesel fuel, industrial contamination).	
<i>Test Parameters:</i> Well Water Quality Package PLUS VOC's (listed below).	
Complete Water Package**	\$399.00
Description: This package is designed for individuals who want to test their water for "everything" that well owners should test their water for. This package screens for the same contaminants that most municipalities test for, but at an affordable rate.	
<i>Test Parameters:</i> Comprehensive Water Package plus a gross alpha/beta screen and a triazene screen.	

*All packages require two sample bottles. Comprehensive water package also requires VOC vials.

**Requires a number of special containers and 4-6 weeks for analysis. Please call for a cooler and the correct containers for this package.

Metals and Mineral Scan

Mineral Scan	\$95.00
Description: Groundwater is stored in various rock and sediment formations. The type of rock or sediment formation is a major factor in determining the overall quality of your water. The mineral scan screens for minerals commonly found in groundwater, as well as metals commonly found in landfills and dumps.	
<i>Test Parameters:</i> Aluminum, Barium, Beryllium, Boron, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lithium, Magnesium, Manganese, Molybdenum, Nickel, Phosphorus, Potassium, Silicon, Silver, Sodium, Strontium, Vanadium, and Zinc.	

Volatile Organic Compounds*

Total Volatile Organic Chemical Test (VOC)	\$149.00
Description: VOC's are a group of commonly used chemicals that evaporate, or volatilize, when exposed to air. This test is a screening for the most common industrial contaminants and gasoline. *EPA recommends testing every 5-10 years.	
<i>Test Parameters:</i> Petroleum Volatile Organic Chemicals (PVOC), trichloroethylene (TCE), trichloroethane, benzene, toluene, xylenes, plus more (total of 53 compounds).	

*All VOC testing requires special bottles. Some tests can be time sensitive and require special shipping instructions.

Pesticide/Herbicide*

Triazene Screen	\$89.00
Description: Screening for pesticides and herbicides used in agriculture. Strongly recommended if nitrate is present in your water. NOTE: A triazine screen is an approximate test.	
<i>Test Parameters:</i> Atrazine and several chemicals it breaks down into.	
Pesticide / Herbicide Screen	\$220.00
Description: Screening for the most commonly used pesticides and herbicides for both agriculture and household. Strongly recommended if nitrate is present in your water.	
<i>Test Parameters:</i> Atrazine, Alachlor, Cyanazine, Simazine, Butylate, Prometon, Metolachlor, plus more (total of 19 compounds).	

*All Pesticide/Herbicide testing requires special bottles and may take up to four weeks to receive results. Please call to order special bottles.
